

Join the ECNG/ALPS  
Energy Advantage  
Program!

Alberta  
Livestock  
**POWER**  
Services Ltd.

Since 2002, hundreds of agricultural producers have taken advantage of our energy program, made possible with the co-operation of the Alberta Cattle Feeders, Alberta Pork, Alberta Turkey, Alberta Chicken, Alberta Egg, Alberta Hatching Egg, Alberta Sugar Beet, Potato Growers of Alberta and Alberta Dairy Producers.

The Alberta Cattle Feeder's Association created a company called Alberta Livestock Power Services (ALPs) to provide customer invoice and support services for participating members. Who could better understand your customer service needs than ALPS, a company created and owned by an agricultural producer organization!

If you are a member, express your interest when we send out our next aggregation package.

or 403.541.0212.

## Looking to Avoid the Energy Roller Coaster Ride & Stabilize Your Monthly Energy Costs?

### Here's How

Sign up today in our Energy Advantage Program and avoid the uncertainty of the volatile spot and regulated market by securing a fixed electricity or natural gas rate.

#### What are the benefits of being on this program?

**Bulk Purchase Pricing** - We bundle your energy purchase with other producers as a group aggregation so you become part of a larger volume purchase thus receiving a price advantage.

**Power Product** - We know your operations vary depending on market conditions, seasonal changes, cost of inputs and the like. Now you get to decide what consumption volume you want to purchase each month. This gives you greater flexibility in meeting your consumption requirements depending on your production cycle.

**Exceptional Customer Service** - Competitive pricing is just the start. ECNG's expertise combined with ALPS' agricultural knowledge leads the way with innovative energy purchases and a focus on customer service. You receive service from knowledgeable energy representatives who understand your consumption requirements. ALPS and ECNG are committed to helping you.

**Accurate, Timely Invoicing** - We stand behind our bills. Catching billing errors isn't your job - it's ours. ECNG's systems and processes calculate and resolve any issues before you receive your bill, keeping future adjustments to a minimum.

**Stabilized Budget** - Avoid the uncertainty of the volatile spot market by securing a fixed electricity or natural gas rate for 3 or 5 years.
