## Career

I strive to be the best and do the best I can every day at any task given to me and complete all tasks given to a high standard. I am highly motivated, have a positive attitude and willing to do whatever task is handed to me. I work well in a group environment or just as competently on my own. I am always up for new challenges and take advice well as to how the task should be done. I'm a quick learner and good listener with the motivation and ability to get the job done.

## **Summary**

I have previously worked on a property part time in the holidays doing everything from driving farm ute's to tractors, moving field bins at harvest and driving the JCB (telehandler).

I have had experience in the shearing sheds for many years from roustabouting, woolrolling, pressing, crutching and shearing.

For the past two years from early October through to the end January I have worked with CBH receiving grain for the harvest season, unloading trucks, using computer operated weighbridge and running the receival site.
